EDUCATION

ITM Skills University

B.Tech in Computer Science Engineering

Navi Mumbai, India

2024 – 2028

PROJECTS

PostAura | Next.js 14, TypeScript, Tailwind CSS, Express.js, Gemini API

2025 – Present

- Built an AI-powered LinkedIn content generation platform focused on improving professional post quality and engagement
- Developed the Antigravity Scoring Engine to analyze hooks, readability, CTA strength, and overall content quality
- Integrated Google Gemini API for AI-powered post rewriting, optimization, and personalized content suggestions
- Designed a modern responsive frontend using Next.js 14, Tailwind CSS, and Framer Motion animations

Sahayak – AI Accessibility Platform | React.js, Node.js, MongoDB, Express.js

2025

- Built an AI-powered accessibility and safety platform focused on assisting users with real-world support features
- Won the Best Innovation Award at Bombay.Bytes Hackathon for developing impactful AI-driven accessibility solutions
- Implemented intelligent workflows for emergency assistance, accessibility support, and AI-based user interaction
- Collaborated with teammates in a rapid hackathon environment to deliver a functional end-to-end solution

LinkedIn Optimizer Tool | Gemini API, Firebase, React.js

2025

- Developed an AI-powered LinkedIn profile analysis tool that provides profile improvement suggestions
- Implemented scan tracking and AI-based scoring using Gemini API and Firebase backend services
- Built secure authentication and optimized frontend workflows for smooth user experience

ReAuto | React.js, Firebase, Claude Vision API

2025

- Developed an AI-powered vehicle valuation platform capable of analyzing vehicle condition using uploaded images
- Integrated Claude Vision API for damage detection and automated valuation explanation reports
- Designed a fully responsive UI using React.js and Tailwind CSS with a modern design system

SugarSense – Diabetes Management Platform | React.js, Firebase, APIs

2025

- Built full-stack features for a diabetes management platform during a hackathon event
- Integrated APIs for health data management and user-focused healthcare functionalities
- Collaborated in a fast-paced development environment with strict project deadlines

Smart Home IoT Backend System | Node.js, Express.js, MongoDB

2025

- Developed scalable backend APIs for controlling and managing IoT-based smart home devices
- Implemented JWT authentication and role-based user access for device security
- Designed backend architecture for efficient communication between devices and users

Dhwani.ai Integration Project | AI, Speech Recognition, NLP

2025

- Worked with AI multimodal systems supporting speech recognition and text-to-speech technologies
- Explored multilingual AI language processing and voice-based interaction systems
- Focused on improving accessibility through AI-powered communication tools

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, SQL, HTML/CSS

Frameworks & Libraries: React.js, Next.js 14, Node.js, Express.js, Tailwind CSS, Framer Motion

Databases: MongoDB, Firebase Firestore, PostgreSQL

Cloud & Tools: AWS, Git, GitHub, Docker, Postman, VS Code, Vercel, Render

AI / APIs: Google Gemini API, Claude Vision API, REST APIs, Prompt Engineering

ACHIEVEMENTS

Hackathon Winner

Bombay.Bytes Hackathon

2025

- Won the Best Innovation Award for the AI-powered accessibility project “Sahayak”

Open Source & Community Building

Tech Community

2025 – Present

- Actively exploring open-source contributions and participating in developer communities
- Building personal brand through LinkedIn content focused on AI, full-stack development, and startups
